Position Summary:

As a Healthy Lakes Team Member, you will work closely with a partner as a team of two to speak to lakeshore property owners in the Greater Molega Lake area. The Greater Molega Lake Lot Owners Association are partnering with the Mersey Tobeatic Research Institute to create the Fostering Landowner Stewardship for Healthy Lakes Program. Your role in this program will be to visit landowners in-person to assess attitudes and awareness around the issues that play a role in lake health, and how human choices can impact it. You will also assist by distributing information packages to residents and provide education where it is needed on topics such as best practices, species at risk, forest fire prevention, and invasive species. You will receive training and have an opportunity to ask questions on all these topics before meeting with any property owners. You will be employed by and report to the Greater Molega Lake Lot

Owners Association and will also receive training and support from staff at the Mersey Toxibiotic Research Institute. This position would be well suited for a student or someone young at heart.
